

# House of Commons Denies Labor Proposal

## WOODSWORTH LOSES SECOND CODE BATTLE

### Denied Right to Introduce Bill to Amend Criminal Code

Canadian Press

OTTAWA, March 8.—For the second time in a week, the House of Commons denied a motion by James J. Woodsworth, Labor, Winnipeg North-Centre, the right to introduce a bill to amend the Criminal Code, which would have given city Conservatives, led by Premier R. B. Bennett, voice to kill the bill before its introduction.

Opposed were 32 Liberals, United Farmers Progressives and Five Conservatives who kicked over the party traces. The tellers were: J. H. Stitt, Bellville, J. E. Ross, Westmount, L. W. Johnson, Cape Breton, Nova Scotia; Macdonald, Cape Breton South, and A. E. Ross, Kingston.

The bill, which the Winnipeg Laborites sought to introduce, would repeal section 56, which relates to unlawful assemblies.

### PRECEDENT IS SET

Government forces voted him down, setting a parliamentary precedent. Previously, however, in one of Mr. Woodsworth's bills, he had been allowed to follow up his earlier defeat by attempting to "clarify or restate" his proposal, with established practices of justice."

For the remainder of the day the house debated grain freight rates in Western Canada.

### DISCUSSIONS ON GRAIN FREIGHT RATES

On the subject of grain rates, the bill could be exported to Shanghai, Hong Kong, Liverpool or Copenhagen at least east that it could be moved across the Rockies to Vancouver for domestic use.

British Columbia politicians were presented with a choice between grain from South Africa at lower prices than those offered by countries engaged in a vigorous lifetime.

Preparations were made for the fundamental debate on the bill to be held in the little country home at Coocherry in Brittany which contains the only room in the house which is fit to be its last resting place.

He was greater in the world than his son, the late Leo Briand, his old comrade, leader of French Socialists.

### GRAIN FERTILITY LOWEST

In the case of the bill, the majority of the members of parliament were on a parity with United States rates, while others had to have increased from \$14,000,000 to \$16,000,000 a year between 1922 and 1926.

The bill will be the principal speaker of the day.

Already great pilgrimages of experts were made to Paris to confer on the bill, and to converge on Paris to participate in the funeral ceremony.

### King's Levee Is Featured Large By Her Presence

Canadian Press Cables

LONDON, March 8.—His Majesty the King, accompanied by Queen Elizabeth and the Duke and Duchess of Gloucester, arrived at St. James Palace today. The Canadian Prime Minister, R. B. Bennett, and Hon. George P. Ferguson, presented Hugh MacLean, Lieutenant-Governor of New Brunswick.

A picturesque figure among the throng was the King's personal physician, Sir Archibald Bannerman, who entered the Royal Engineers 10 years ago and has since been a favorite with the royal family.

Rumor wild reports came from the King's physician that he was about to retire. General Head presented 44 young officers of the Royal Engineers to His Majesty.

TEN DIE WHEN 2 TANK TRAINS MEET HEAD-ON

### Gasoline From Overturned Cars Blaze Track for Mile

Associated Press Cable

CONSTANCE, Rhodesia, March 8.—Two Rhodesian miners believed to have been burned to death as a result of a collision of two tank trains near here today. Gasoline from ruptured tanks of both cars took fire and blew along the right of way for a distance of almost a mile, killing all but one man who was rushed to the spot from Beauchere and Constance.

LODGE, Rhodesia, March 8.—An English electrician from Rhodesia reported to have been killed by a tank train which had exploded and burst into flames after hitting a bridge.

THREE PERSONS KILLED IN COLLISION WITH TANK TRAINS WHICH COLLIDED AND CAUSED FIRE AND EXPLOSION.

NIGERIA, France, March 8.—Three persons were killed in a derailment on the Mont de la Lance railway at Beaufort, near Monte Carlo, this morning.

The accident was a violent winter storm on the slopes of the Mont de la Lance, which rises 2,000 feet above sea level.

ROSE GIORDANO OF NEW YORK RETURNED HOME.

CHICAGO, March 8.—The kidnapping in New Jersey of the infant son of Colonel Charles A. Lindbergh recalled to police officials a long list of kidnappings during the last several decades. Outstanding were the following:

1874—Charles Ross of Germany, never found.

1888—Gerald Lapiner of Chicago, later found in Ohio.

1900—Edward Cudahy, son of the wealthy meat packing king of Milwaukee, was a prisoner for the abduction.

1907—Rose Giordano of New York, later returned home.

The kidnappers were arrested two years later.

1909—Billy White of Sharon, Penn., released after the payment of \$10,000 ransom; kidnappers were sentenced to prison.

1910—Michael Simeone of New York, held for \$8000 ransom and later found slain.

1911—Letha and Hazel Gretchen, wife unharmed.

1911—Baby Hencko of Chicago, fate a mystery; believed to have been slain.

1913—Catherine Winters of Newcastle, Ind., never found.

1915—Ginny Glass of Jersey City, N.J., believed to have been slain.

1919—Baby Lloyd Kett of Springfield, Mo. slain.

1919—Billy Daney of New Jersey. His body was found months later in a swamp.

1924—Bobby Franks of Chicago, slain "for a thrill" by Nathan Leopold and Richard Loeb, university students, now serving life and 99-year terms in the State penitentiary at Joliet, Ill.

1931—Dr. Isaac D. Kelley of St. Louis; held for \$150,000 ransom, but released after paying an undisclosed sum.

## Guarding Lindy's Estate

Protected from invasion by crowds of curious persons, the home of Colonel and Mrs. Charles A. Lindbergh here is shown after a cordons of New Jersey State troopers had been placed about the grounds. All evidence and prints that were taken for examination. Visible on the back porch are some of the detectives who began the investigation immediately after the kidnapping was discovered. The corner room above them is the one from which the child was taken. In the lower photo those tall-toe footprints were becoming a permanent record of the sensational case when the picture was taken of a muddy soil near the Lindbergh home.

ANNE SEEKS COMFORT IN HER POETRY

### Murmurs Favorite Lines in Effort to Forget Her Grief

HOPKINSVILLE, Ky., March 8.—From the stone-walled terrace of the Lindbergh home a brown-haired girl with the brown eyes of a poet gazed with a weary expression upon the scene below, trying to formulate lively phrases to keep her mind from dwelling unhappy.

Upstairs in a corner room the shutters of a window were drawn to keep out the memory of a boyish boy who had sent the girl's mind racing into poetry.

But Anne Morrow Lindbergh will not soon be won from the beauties of poetry again. She is a young woman who has had a hard physical education, the wife of that brilliant aviator who is the nation's hero, a mother of two sons whose worthiness to pray.

MURMURS FAVORITE LINES IN EFFORT TO FORGET HERSELF

A rare young woman to Anne Morrow Lindbergh, reticent, given to short words and short sentences, is in reality a poet who has learned to express herself in rhythmic lines. And in this time of trouble her poetic nature is still strong. Her mother, who is a widow, keeps her healthy, her health precarious, the wife of that brilliant aviator who is the nation's hero, a mother of two sons whose worthiness to pray.

But Anne Morrow Lindbergh will not soon be won from the beauties of poetry again. She is a young woman who has had a hard physical education, the wife of that brilliant aviator who is the nation's hero, a mother of two sons whose worthiness to pray.

## If It Will Help Alberta The Edmonton Bulletin Is For It

TUESDAY, MARCH 8

### THE COST OF RELIEF WORK

Information given in the House of Commons shows that under the unemployment relief legislation \$70,472,832 was spent in giving employment to 334,301 persons. The total number of man-days worked was 7,415,973. It thus cost the country \$10 per day to provide the work. But the average cost of work was \$24 per day, taking the wages paid on the trans-Canada highway as a standard; or a total of eighteen millions out of the seventy.

There would seem to be room here for a good deal of explanation. It is quite understandable that not all the money spent in relief work does or can go as wages. But when three-quarters of the men spending more than twice as much as those who are given work, the amount of assistance does not appear to be in line with the cost, by a wide margin.

### ALLAKAKET HOLDS THE RECORD

"And some have greatness thrust upon them." The hamlet of Allakaket, on the Koyukuk river, somewhere up in Alaska, has attained distinction. It was 82 degrees below zero there Sunday week. Henceforth that town is on the map, and a hundred million people who never heard of it before will know it, otherwise gone to their graves in ignorance of its existence, will remember it—and shiver.

Now we know where those cold nor-westers come from. No longer can Edmontonians feel safe from the north. If they get a chill, nor Medicine Hat is labelled throughout the central States as the source of the blizzards which sweep down from the international boundary. The headquarters of the brunt of the pre-climate meteorologists is Allakaket, on the Koyukuk river, in the United States territory of Alaska. It has hung out a record that is unchallenged and unenvied—82 below zero.

### NO MORE SUNDAY CONES

An Edmonton merchant has been fined for selling an ice cream cone on Sunday which the purchaser chose to eat somewhere else than on the premises. Yet the selling of ice cream cones on Sunday for consumption on the streets has been a thriving business every summer for many years past. If the fine imposed upon this offender had been exacted each time the licensees committee last winter, the proceeds would be enough to pay the first instalment on the year's city taxes.

Evidently there has been a change in the attitude of the authorities on the subject of Sunday cones, but in that regard. That being the case, it is time for the first man to be haled into court was left off with the minimum penalty. But in prosecuting him the authorities have pledged themselves to stick to the letter of the law, and others who commit the like offense. The public and the merchants should make note of that fact, and remember it when the motoring season opens once again.

### ALBERTA'S COAL PRODUCTION

The output of Alberta's coal mines was down last year 1,200,000 tons from the figure of the year before, and two and a half million tons from the peak year production. Of 316 mines operated at some time during the year only 271 were working when the year ended.

These facts illustrate the unsatisfactory conditions that have prevailed in the mining industry, and explain why Alberta miners have been sharing to the full the hardships of the depression. The public and the merchants should make note of that fact, and remember it when the motoring season opens once again.

### THE GOLDEN FLEECE

The output of Alberta's coal mines was down last year 1,200,000 tons from the figure of the year before, and two and a half million tons from the peak year production. Of 316 mines operated at some time during the year only 271 were working when the year ended.

There is a hint in these figures that our coal mining industry has been rather over-developed, and that only in exceptionally cold winters can the mines operate to maximum capacity and the miners find steady employment. The year was mild, and so was the winter before that. Despite the sales made in Ontario under the experimental freight rate, production has been down, and miners on part time in both years.

There is a hint in these figures that our coal mining industry has been rather over-developed, and that only in exceptionally cold winters can the mines operate to maximum capacity and the miners find steady employment. The year was mild, and so was the winter before that. Despite the sales made in Ontario under the experimental freight rate, production has been down, and miners on part time in both years.

Roger W. Balson: If the United States and Canada had agreed to a general coal control, the market would not be so difficult to dispose of.

## THIS MAN ASKS GENIUS FOR WIFE

DEAR MISS DIX—Some men look for beauty in the woman they marry. I am eager to marry, but I want the most intelligent woman I can find. I would like for her to have a good mind, a good heart, and a good soul. I want a woman who loves herself, I admire in others the intelligence which I do not possess. I wish to identify myself with a brilliant woman and have intelligent children. I wish as I have described, intelligent and yet energetic enough to live a happy life, and able to contribute to the welfare of married life, so that I can ask God to send me a genius for a wife.

DAVID.

**Answer:**  
Well, if you get a genius for a wife, David, I am afraid that you will find out that matches were made in hell instead of in heaven. There are many women who are little better than a wife to live with day in and day out.

The man full of temperament and unreasoning belligerence, and lack of common sense and they are selfish and egocentric and entirely incompatible to all about them. Before you get a genius for a wife, you may be getting a genius before you spend any more time, money and effort in trying to find one. The Lord might take you at your word and send one to you.

And, after all is said and done, what a man wants in a wife is not necessarily the same as what she wants in a husband. It is just the plain, ordinary ability to be a good wife and mother and make a comfortable home, plus enough intelligence to make her a good companion. You don't have to spend his life gazing at his wife's feet looking up to her. He wants her to thrill a little over him.

But you are right in putting brains at the top of the list. If a man has brains, then a woman should have as a wife. Most men never consider that. They think that a girl has "IT" or a way with her. No, for a wife, Yet of all of these brains, the only way that can be put to last.

Beauty fades in a few years. Money often takes its wing.

Fashion does of course and the old adage still endures that a woman should have a wife. Most men never consider that. They think that a girl has "IT" or a way with her. No, for a wife, Yet of all of these brains, the only way that can be put to last.

The only thing in the world that can keep marriage from growing flat on your hands is for your wife to have her own interests. Women need some private means and with children are especially fond of having their own interests. They cannot afford many outside diversions and whether they are interested in reading, writing, to death or whether they spend them in interesting converse depends upon what housewife has to give of gaiety and intelligence.

If she is stupid and heavy and dull, with no diversions except those from the kitchen, then the nursery and the garden, she will be a bore to each other's faces and guerra to put a little pep into things.

But if she is alert and alive, if she reads and thinks and has a sense of humor, then she will be a joy to her tigress and there will never be a moment of boredom.

Also, more intelligent a woman is, the easier she is to live with, because she has philosophy and knowledge and a sense of humor. You can change a wife, man, but a fool never.

As to how to find a woman of intelligence, that's a question that intrigues you. You are probably overlooked by other men.

DOROTHY DIX

HARMFUL FASHION HABITS

London, March 8.—The high heels women wear on their shoes are, in addition to being harmful to their health, also very dangerous to their lives. Lieut.-Col. J. A. P. Pirie, secretary of the "Safety First" association, says that 1,000 persons were killed by falling downstairs last year than men. This he attributes to the high heels.

## What New York Is Wearing

By ANNABELLE WORTHINGTON

2536

3408

No. 2536—Mrs. E. charming day dress with a gay youthful neckline, note in its bright topped bodice. It is the much favored light navy blue with a wide belt and a contrasting belt. Size 26 \$12.50. Size 28 \$14.50. Size 30 \$16.50.
